

UNIQUE LIGHTING SYSTEMS®

HUB Wiring Installation Instructions

Models: *Equalizer™ HUB* *Satellite HUB* *Galaxy HUB* *Intelli-HUB*

Consult with a qualified electrician and local electrical codes before installing any electrical product.

Risk of electric shock. Turn off power before servicing. Do not install within 10 feet (3.05 m) or less of a pool, spa, or fountain.

1

Feed homerun and fixture wires through HUB.

2

Connect all ribbed fixture wires to the ribbed homerun wire. Insert all wire joins into provided grease cap.

3

Connect homerun wire with writing to one side of fuse link (except for FHUB).

4

Connect fixture wires with writing to other side of fuse link.

5

Insert all wire joins into provided grease cap. Thread on cap.

6

Push wires into HUB body. Install lid. Use paint pen to label hub and transformer number.
